MEMO FOR THE RECORD

SUBJECT: Aerial pix for NIS

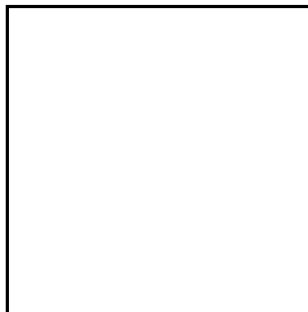

77

25X1 1. On 8 November, following my again briefing up this general subject at NCM 387 on 6 November, I informally again talked with D/NPIC about ways/means of adapting more of this type coverage for NIS. He thought much if not most would still require SECRET even if devoid of special annotations and perhaps precise date, but felt only a small percentage would remain [] and indicated that an ad hoc and judicious approach on classification might well reduce the Secret-as-against-Conf problem. He said the present contact for DIA seekers for NIS pix is Colonel James L. (Larry) Cole (USAF), who runs a unit identified as DIAXX - Room 2D913 in the Pentagon - Code 11 Ext 57696.

2. D/NPIC confirmed that NPIC is getting increasing volume and value from ground-level photography obtained via specific requests served on OCR/CR. This has been indicated to NIS Committee members, with reiterated emphasis on the necessity for very specific requirements in agreed form as basic in obtaining effective search for pix through such sources as LIFE.

3. Colonel Cole will be mentioned to Committee members at the next meeting.
